EXPERIENCE

Pharma IT Intern — Sun Pharma Industries Ltd.

Gurgaon | 03/2026 – 09/2026

- Worked on software development within the Pharma IT function, learning the complete SDLC workflow alongside system administration and AI/data projects.
- Built the NDC Management System and worked on the NovaFold AI protein structure prediction project (see Projects).

Freelancer — Dayawati Foundation

New Delhi | 11/2024 – 05/2025

- Created scalable, user-friendly interfaces with functional animations.
- Engineered scalable frontend architectures using advanced JS libraries and frameworks, improving site speed by reducing loading time.

PROJECTS

NDC Management System

Sun Pharma Internship Project

Next.js, PostgreSQL, NextAuth, Vercel

- Built a full-stack NDC Management System using Next.js, deployed on Vercel with a PostgreSQL backend.
- Implemented Google SSO login via NextAuth, an admin panel with user and session management, and secure authentication (bcrypt hashing, rate-limiting, audit logging).
- Added NDC registry and audit trail modules with Excel/CSV export.

NovaFold AI — Protein Structure Prediction

Sun Pharma Internship Project

NovaFold AI, AlphaFold 2, I-TASSER, Protean 3D

- Researched and evaluated NovaFold AI, DNASTAR's cloud-based protein structure prediction platform (powered by AlphaFold 2 and I-TASSER), which lets lab scientists predict 3D protein structures directly from amino acid sequences without specialized bioinformatics expertise.
- Assessed how the tool speeds up structure determination, cutting analysis time from weeks of traditional experimental methods down to hours, making it faster and easier for bench scientists to get usable results.
- Studied its application to challenging, pharma-relevant protein classes (membrane-bound proteins, GPCRs, fusion and multidomain proteins) to support faster research and drug discovery workflows at Sun Pharma.

AI Resume Analyser

Personal Project

Next.js, Puter.js, Claude API, PostgreSQL

- Built an AI-powered resume analyser using Next.js, integrating Claude via Puter.js to review resumes and generate feedback.
- Stored user resumes, analysis history, and scores in a PostgreSQL database.
- Designed the UI to surface section-wise feedback and an overall resume score to help users improve their resumes.

DevDo

05/2024 – 07/2024

CSS, JavaScript, jQuery, SCSS, Bootstrap, AJAX, Laravel

- Developed a dynamic website inspired by LinkedIn and GitHub, letting users register as developers, designers, or companies.
- Built role-based profiles with portfolios, job postings, and applications, plus social features like follow, like, and comment.
- Used AJAX for smooth, asynchronous page interactions, and styled the platform with SCSS and Bootstrap for a responsive design.

EDUCATION

IGNOU

New Delhi | 2024 – Present

Bachelor of Computer Applications (BCA)

NSIC Okhla

New Delhi | 2023 – 2024

Diploma, Web Designing and Development — 80%

New Green Field School

New Delhi | 2008 – 2022

Senior Secondary, Humanities — 71.2%

SKILLS SUMMARY

Languages: C, JavaScript, Java, PHP

Frameworks: Next.js, ReactJS, Node.js (PERN Stack: PostgreSQL, Express, React, Node.js), AngularJS, jQuery, Laravel, SCSS, Tailwind

Databases: PostgreSQL, MySQL, SQL, Docker

Pharma IT / Compliance: CSV Lifecycle, GxP Standards (21 CFR Part 11, GAMP 5), OpenText Documentum, Azure

AI & Automation: Agentic AI, n8n, Claude API, Microsoft Copilot Studio

Computational Biology: NovaFold AI, AlphaFold 2, I-TASSER, Protean 3D

Data Engineering: Databricks (ETL/ELT Pipelines, Medallion Architecture, Delta Live Tables)

Cloud & Tools: AWS, Vercel, Railway, VSCode, Figma, Photoshop, Canva, WordPress, Git

CERTIFICATIONS & LANGUAGES

Diploma in Website Designing and Development — NSIC Okhla

English (Fluent) | Hindi (Fluent)
